

Circuit Description

The DM252 comprises MCU IM7206_64P, RF IC IM6802, DC/DC3.3V/4.2V, 12MHZ Crystal, Flash 25V 512, 2.5" HDD. Computer connect and controls the DM252 through USB jack to read and write. And the MCU IM7206, which is high-speed USB Peripheral Controller IM6802, the RF IC Chip, the working frequency is 125kHz, the memory software of the MCU IM7206 transmits data with 2.5" HDD through SATA connector, and controls the LED/BUZZER
